Who may decide what

Agents and models	16 agents read through scoped views and propose; a model judges only what the rules leave uncertain, and in several places may lower a verdict but never raise it
Validators	re-run the checks; only a passing re-run closes a hard objection
Experts	alone set G7; the contract, not finished tasks, decides whether research is accepted
Kernel	event-sourced log; each event carries its principal; state replayed and hashed every round

c

Jingui yaolüe ch. 13, a clause on xiaoke 消渴 in three witnesses (punctuation removed)

omission (脱)　丸 → 圓

Deng Zhen print, 1340	男子消渴小便反多以飲一斗小便一斗腎氣丸主之
Wu Qian manuscript, 1395	男子消渴小便反多以飲一斗－－－－腎氣丸主之
Maijing, Yuan print, 1330	男子消渴小便反多以飲一斗小便一斗腎氣圓主之

圓 (圓) for 丸 avoids the name of Emperor Qinzong (桓, from 1126): that witness descends from an edition made after 1126
